

Er. KANCHAN SHRESTHA

Data Analysts

Lalitpur, Nepal | +977-9840044901 | kanchanshrestha0332@gmail.com | github.com/Kanchan616

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on, end-to-end analytics experience spanning Python (EDA, data cleaning, feature engineering), SQL/PostgreSQL for business querying, and dashboard development in Power BI and Excel. Skilled at translating raw, messy data into clean datasets, actionable insights, and clear visual reporting for both technical and non-technical audiences. Comfortable working independently and delivering accurate, well-documented results on deadline.

CORE SKILLS

- Python: EDA, data cleaning, feature engineering (Pandas)
- SQL / PostgreSQL: business queries, data extraction and analysis
- Data Visualization & Dashboards: Power BI (KPIs, slicers, interactive charts), Excel dashboards
- Microsoft Excel (Advanced): formulas, pivot tables, lookup functions, data validation, dashboard building
- Data Cleaning & Quality: handling missing values/outliers, deduplication, validation checks for accuracy and integrity
- Communication & Collaboration: stakeholder requirement gathering, insight reporting, documentation

APPLIED DATA ANALYTICS PROJECTS

Neuralens – AI-Powered Assistive System | Final Year Project

2025–2026

- Built and validated a custom dataset of 49,000+ labeled images, applying data quality checks to ensure accuracy for model training.
- Analyzed detection performance data to identify error patterns and refine data labeling and system logic accordingly.

Sales & Marketing Customer Retention Analysis | Personal Project | 2026

- Cleaned and analyzed a 15,000-customer dataset in Excel to identify retention and churn patterns.
- Identified churned customers and calculated churn rate through exploratory analysis.
- Built an Excel dashboard with KPIs and visualizations to communicate customer retention insights.

Customer Behavior Analysis | Personal Project

2026

- Performed EDA, data cleaning, and feature engineering in Python (Pandas) on a 3,900-row dataset; analyzed data with SQL in PostgreSQL
- Built an interactive Power BI dashboard with KPIs, slicers, and charts to surface customer trends

Vrinda's Store Analysis | Personal Project

2026

- Cleaned, processed, and analyzed a 31,045-row retail dataset in Excel to identify sales trends and insights
- Built an interactive Excel dashboard with KPIs and visualizations to present findings

RELEVANT EXPERIENCE

Data Management Intern | Vyas Nagarpalika (Municipal Office), Tanahun

2025 (3 months)

- Entered, reviewed, cleaned, and validated municipal data using Microsoft Excel, checking records for accuracy and consistency.
- Prepared and typed official letters and documents in Nepali Unicode, gaining practical experience with Nepali Unicode data entry.
- Worked with the digital records team to confirm data accuracy and maintain consistency across systems

EDUCATION

Bachelor of Engineering, Computer Engineering

2026

Cosmos College of Management and Technology, Pokhara University | CGPA: 3.82

TRAINING

- Data Analysis with Microsoft Excel, SQL, and Power BI
